The New Social Order.

Quoting no doubt to it being the busy threshing season, not so large an audience as expected turned out Saturday Evg. to hear Mr Geo Bevington, CCF candidate in this Riding. Mr Bevington said, in part: Co-operation is our method! We believe that co-operation in the ownership of the means of life is essential to human freedom; that co-operation is the only method of human dealing which is worthy of the intelligence of the race. We therefore stand firmly for a New Social Order which we have named the Co-operative Commonwealth. The goal that such a system will strive to reach will be "Humanity First," to the end that human well being shall be reached, the abundance of which modern resources make possible shall be distributed to the people for their use. We believe that capitalism is a worn-out system; that all the debt, poverty, unemployment and war of our time are due directly to it. We are out to change that system; not merely to change a portion of it, but to start the building of a new Social Order, based on the fact of abundance for all. Competition is inhuman and unethical. It leads to monopolies and millions for a few; and slavery, debt, poverty for the many.

Sporting Notes.

As bans seem to be the fashion able thing this season, local sportsmen are now complaining that we no sooner get rid of one ban than another pops up. They refer, no doubt, to the weather. A short time ago the premature cold snap reminded us of winter sports, and, in fact, some hockey fans had started a chattering on the prospects. But along comes the Nitelie Summer and puts the ban on all thoughts of ice sports.

A revival of the summer pastimes occurred on Friday, when a team of girl basketballers from Evansburg paid Stony a visit and engaged in play with the S.P. Hi. girls on the local courts. Local girls seemed to have the edge on the visitors from the start, and the game wound up with the score—S.P. Hi. 20, Evansburg 8.

The Stony players were—Margaret Pailer, Edna & Ida Zucht, Edna Miller, Emma Michael, Emma Fischer, Mrs. A. van der Schaaf, Rachel Willie, Mary Campbell. Referee—Mr E F Lewis. Timekeeper—Miss Loure Everman.

Poor Getting Poorer.

A number of daily papers in the East think the Stevens campaign "seems to be taking the form of emotional crusade against big business." To which officials at Reconstruction party headquarters replied: "The Stevens movement is not an emotional appeal, but a conviction founded on the fact that the poor man is getting poorer, and the rich man is getting richer."

Change And Rest

During the past two or three weeks radio fans, no doubt, have become rather tired of listening to the pleas and complaints of the politicians who have been making the welkin ring with appeals for support for the candidates of their choice, with fulsome praise for the policies of their own party and thunderous denunciations of the humiliations, fallacies and falsehoods of their opponents.

It was not very long ago that the opportunity afforded the farmer in the country and the citizen of the small town or village to absorb political knowledge and information—and sometimes misinformation—was restricted to one or two meetings during the campaign in the little school house on the other side of the pasture field or in the hall over the hardware store.

It often meant that the country resident had an opportunity of hearing only one side of the political story. A heavy fall of snow, a deluge of rain, the necessity of remaining home to act as nurse to a sick cow or to entertain unexpected visitors—all these and many other things—intervened to make it impossible to attend a second meeting and hear what the opposition had to say.

All that has been changed now. The politician has discovered the radio and the ability it gives him to reach into the homes of the land and pour forth his message, wily, nifty, into the ears of willing and unwilling listeners alike. And he took advantage of this facility to the nth degree during the Federal election campaign. Never in the history of Western Canada has the radio been brought into requisition so extensively to preach the gospels of tariff, internal reform, social credit, currency changes and what not as the solution to the ills with which the country has been, is and will be, a prey.

If the country and small town voter in the past has had to make up his mind from the election of this facility to the nth degree during the Federal election campaign. Never in the history of Western Canada has the radio been brought into requisition so extensively to preach the gospels of tariff, internal reform, social credit, currency changes and what not as the solution to the ills with which the country has been, is and will be, a prey.

It is quite possible, on the other hand, that he may have some ground for complaint that the diet has been too heavy, decidedly mixed, in fact, that he has been surfeited with so much information, partial information and misinformation that the issues, instead of being clarified became more and more confusing with succeeding broadcasts.

While the radio can be thanked for having done much to make available to the elector a great deal of knowledge, on the other hand as a disseminator of political platforms and policies and party propaganda it has some disadvantages.

One of the disadvantages is the tendency on the part of a considerable percentage of political radio lecturers to gabble their speeches at a speed comparable to the recent automobile record established by Sir Malcolm Campbell. To the listener at the receiving end it appears as though the speaker had back of his mind something like the following:

"I am paying, or the party is paying (as the case may be) a dollar a minute for this. I am only allotted ten minutes and for the live of mike (short for microphone) I've got to jam as much across the air in that time as my breathing apparatus will permit and get the greatest possible value for the money."

As a result the gentleman on the receiving end is lucky if he is able to catch more than one sentence out of every three and to absorb more than one of every six.

The political marathoner appears to forget, too often, that what counts is what he is able to plant in a receptive mind at the other end and not the number of words that he can shout into the mike—poor Mike—in a given number of minutes.

The political expounder also seemingly too often forgets that he starts on his race with a serious handicap compared with the platform orator at a public gathering. The latter is able to point his remarks or to emphasize his periods with a shrug of the shoulder, a lift of the hands or a flash of the eye and these devices, used with discretion, help the speaker to impress his views on the listener.

To the radio speaker all these and other devices of gesture, and personality of appearance and mien, are denied and he must rely solely on infection of voice, distinct articulation and pause, for effect, and if he does not make full use of these his message may be nearly a total loss.

After a few weeks of repetition of political dietary the average radio fan may well be pardoned if he heaves a sigh of relief as he twiddles the dial and finds seeping into his consciousness the pleasing strains of a first-class orchestra, the well modulated tones of the players in a radio drama or even the thump of the drums and skirl of the bagpipes.

A change is as good as a rest.

Squared Put Out Lights

Seven villages in Madison and Onondaga counties, New York, used lanterns and candles for nearly five hours all because a grey squirrel clung to a grounded part of a power pole and stuck its nose against a wire. One of the wires was burned through.

A New Experiment

Dr. S. S. Brukhenko, who has been experimenting in the revivification of animals, announced that a new state scientific institute is being organized at Moscow for experimental work looking toward the revival of human beings, after "incomplete death." He explained "incomplete death" is death such as from accidents where the vital organs remain intact.

Good Guernsey Record

The four-year-old Guernsey cow, Lark of Chicom, owned by Dr. W. E. Wessely, Milner, B.C., has just completed an outstanding production record of 11,425 lbs. of milk and 624 lbs. of butter fat on twice-a-day milking, in 365 days.

Motor alcohol is being made from corn in South Africa.

Striving To Reach Goal

Scientists Hope To Bombard Stratosphere With Speedy Rockets

Col. Charles A. Lindbergh, who mixes science with aviation, and Harry F. Guggenheim, the financier, gave the outside world a hint of the importance of ethereal experiments which may send rockets streaking into the stratosphere at super-speeds. Tests at the desert laboratory of Dr. Robert H. Goddard brought Guggenheim's announcement that the Guggenheim Family Foundation would pour more funds into the enterprises.

The "important" problem of automatic stabilisation of rockets in vertical flight already has been solved, it was reported authoritatively and projectiles have been fired in preliminary work at speeds approximately 700 miles an hour.

Dr. Goddard explained the success of numerous tests in which vertical flight of the rocket had been maintained by a gyroscope.

Renewed aid of the Foundation assured Dr. Goddard that now he may set out upon his prime objective, to send the rockets, propelled by liquid oxygen and gasoline into the outer space with recording instruments for stratigraphic data of significant value to aviation and meteorology.

From a sixty-foot tower Dr. Goddard would shoot his twelve-foot rockets to altitudes greatly exceeding those which balloons are able to reach.

With his rockets he hopes to pierce the stratosphere in regions more than 30 miles high, so imperative to science, where electrical phenomena including ionization and the reflection of radio waves occur.

Astronomical photography without the interference of the earth's atmosphere would be another prized objective.

Sikorsky Flying Boat

British Firm Secures Manufacturing Rights For Aircraft

British Aircraft Ltd., has acquired manufacturing licence rights to the Sikorsky clipper flying boat, officials of the United Aircraft Corporation report.

Beyond affirming that the deal had been made with the Manchester, England, firm, United officials declined to give information about the negotiation between British Aircraft and the Sikorsky Aviation Corporation, of Bridgeport, Conn., which is United member.

United officials did not comment upon a report that the four-motored craft are desired for use in Australia-New Zealand mail, express and passenger service. Sir Charles Kingsford-Smith, trans-oceanic flyer, was in Bridgeport recently during talks of the latest clipper ship. His presence there lent strength to the report of the Australian-New Zealand venture.

Palestine Is Progressing

But Men Outnumber Women Two To One

Zionism in one way leads the world, for in Palestine, there is no unemployment. There is work for all in the great program of building and of wasteland reclamation now in progress. Money from the outside continues to pour in, and adequate funds are available. But it has run into an unexpected difficulty. Among the newcomers the men outnumber the women two to one. It is the same experience so many lands have had. There is an alarming shortage of wives for the young men. That happened in the early days of Virginia, when it was necessary to send shiploads of marriageable girls to bring society to its proper equilibrium. History may repeat itself—Cincinnati Enquirer.

Takes Time For Tea

John Bull may complain that he is one of the most heavily taxed men in the world to-day, but certainly he is not one of the hardest worked.

An expert construction foreman who recently returned to England after spending a number of years in Canada, writes:

"This is a terrible country to work in. We stop work at 10 a.m. and again at 3 p.m. and a cup of tea. They certainly don't know what hard work is."

Join the "Back to Ogden's" Movement

"Back to Ogden's!" That's the slogan "roll-your-owners" are shouting right across the country! They can now afford to get back to Ogden's—and they want to roll cigarettes as Ogden's Fine Cut alone can roll them. Join them yourself! Get a package of Ogden's and use "Chanticleer" or "Vogue" paper with it.

Easy To Be Safe

Explorer Finds Cannibals Will Not Eat Man Who Smokes

Safety measures are being taken by an explorer against being eaten by cannibals. "Cannibals won't eat people who smoke—they think it impairs their flavor," declared Dr. Edgar de la Rue, French geologist, on landing in New York from France on his way to the Cannibal Islands of the New Hebrides. Dr. De la Rue said that he found it a wise precaution to take plenty of tobacco with him on his visits to the islands. He goes there for the purpose of making a survey for the Natural History Museum of France.

British Naval Program

Calling For Bids For Twenty-One Fighting Ships

Great Britain began calling for bids on 21 ships embraced by her 1935 naval building program. Ten million pounds sterling (\$50,000,000) will be required for the 1935 construction program, it was estimated. This program calls within the limitations of the Washington naval treaty and is designed to replace over-aged ships. The new ships will include three cruisers, nine destroyers, three submarines, one submarine depot ship, four sloops, one survey ship, and several smaller vessels.

Work on this program was expected to be spread over about three years. Some of the fighting vessels will be built by the royal dockyards, and the construction probably will be in full swing by next spring.

Communication Boats

Japanese Railway Has New Idea For Helping Passengers

A new idea in railway comfort adopted in Japan would aid greatly to our travel if it were adopted in this country. In every station blackboards are provided on which an inscription states: "Passengers desiring to communicate with friends expected later are invited to write messages." Here are some of the messages: "I waited half an hour, then took the 10:50 to Kyoto." "Can't go to-day; please don't be angry." "Have gone to restaurant, second floor." "Evidently, trouble is suggested by this note." My husband returned. Come next week."

Proved Their Efficiency

Emperor Scissored Decorating Three Guards For Arrested Him

Emperor Haile Selassie was arrested by three of his palace guards in mission—and the three were decorated. The Emperor is in the habit of donning peasant costume, and making surprise inspections of Addis Ababa at night. He returned to the palace after curfew and found three of the imperial gates barred. At each gate he was arrested by the sentry on duty and released only when a sergeant was called out.

FASHION FANCIES

690

SMART AND ENGLISH LOOKING SCHOOL DRESS WITH FLATS AND BUTTONS NECK TO HEEL

By Ellen Worth

Flats are used with delightful effect down the front of this school girl's dress. Not only do they trim but they add the necessary finish to this model.

A plaided woolen in searlet and black dress is made of a single trim made this cunning dress. The bone buttons repeated the red tone. A cotton print in Dubonnet-red ground is another new and smart scheme for its development.

Style No. 690 is designed for sizes 6, 8, 10 and 12 years. Size 8 requires 2 yards of 36-inch material with 3/4 yard of 18-inch contrasting.

Patterns 15c each. Address mail orders to: Pattern Department, Winslow Newspaper Unit, 175 McDermott Ave. E., Winnipeg.

Let the new Fall and Winter Fashion Magazine assist you in assembling your family's fall clothes. There are designs for every type and every occasion. And of course size of our perfect fitting patterns is obtainable for every design illustrated. Don't delay! Send for your copy to-day!

Program Of Laboratory And Field Work Investigation Of Minerals In Canada

Realizing the value of modern methods and technique in mining operations, the Canadian Department of Mines has in full swing a program of laboratory and field work involving investigations that will affect all branches of Canada's mineral industry. Laboratory tests and experimental work are under way that relate to such distinctly separate fields of endeavour as the greater utilization of Canadian coals in the domestic markets, the revising of ore treatment processes for use in Canada's new gold fields and the improvement in quality of ceramic ware.

The field program is equally broad in scope. Officers have been placed in strategic areas to gain first-hand information on the varied activities of the industry. Field work also includes a survey of the limestone industry in Ontario and British Columbia; a field study of the fire clay, and other high quality clay resources in certain areas in Northern Ontario; a study of the industrial mineral situation in Quebec, the Prairie Provinces, and British Columbia, a survey of industrial waters in Ontario and Quebec; and the investigation in Ontario of mineral products used for shingles, bricks, mineral fillers, and sand blasting.

The heavy volume of tests and experimental work on gold ore continues as the feature of activities in the ore dressing and metallurgical laboratories. Treatment processes have been devised for practically all of the gold mining plants that have entered production during the year. Much of the work is in the nature of microscopic studies and experimental tests on ores and ore products from established gold producers. Test work on base metal ores has been confined largely to the development of new metallurgical processes for properties with proven ore reserves, and to problems relating to higher metal recoveries at established producing properties.

Ceramic investigations are mostly in the nature of laboratory tests and experiments. With the keen competition existing at present, manufacturers are making every effort to improve their wares in order to stimulate sales. The facilities of the laboratories are being utilized more and more due to the greater use in the clay industries of scientific principles, the introduction of new processes and the development of new products.

Judging By Signs

Prospect For Long And Hard Winter In Manitoba

Manitoba's going to have a long, hard winter this year and it's coming earlier than usual, according to the folks who cast their eyes around about this time each year, seeking nature's portents of the season ahead.

Winter will come early this year, these nature hunters have expounded and point to the fact that the Canada geese returned to the prairies before the full of the harvest moon, which always indicates an early winter. Other signs are the flocking of the ducks to the prairie stubble fields long before cold weather and the busy squirrels storing up large quantities of food.

The weather prophet after gravely considering the mud chimney houses of the crawfish, better known as crabs, along the margins of ponds and sloughs, declare that this year the little stucco dwellings are bigger than usual. This, say the observers, indicates a cold winter.

Youth Must Be Served

Toronto proposes to ban the looting of motor horns between 11 p.m. and 7 a.m. About the only reason the prohibition should not last from 7 a.m. to 7 a.m. is that some young fellows would have to resort to the courteous but more troublesome way of getting out and going up to the front door to let her know.

A useful export outlet for Canadian dressed poultry has been opened up in the British West Indies, 100 boxes having gone forward during the first week of August.

Barley For Growing Lambs

A Good Way Of Marketing Low Grade Grains

One of the best ways of marketing low grade and weedy whole grain is through sheep, either by fattening or wintering the sheep. Sunflower silage is a very valuable supplement to the ration when fattening lambs, but in the tests outlined here the only roughage used was oat straw. Three tests have been conducted at the Dominion Experimental Station at Scott, Saskatchewan, in comparing barley with oats for wintering female lambs held over for breeding purposes. Two lots of fifteen lambs each were used. The lots were divided as evenly as possible, according to individual weights and breeding, and the rations were identical except that one lot received oats and the other barley. The average quantity of grain fed was only about one pound per head daily, as the lambs were not to be marketed.

The trials lasted on an average 91 days and the average gain per head was 12½ pounds when the lambs were getting oats and 14 pounds when they were getting barley. It was observed that the gains were affected by the quality of either grain used and although barley gave higher gains in this test it appears quite probable that good quality oats would be superior to medium or low grade barley, pound for pound, in feeding lambs. Hence, the relative price and quality of each is the chief factor in deciding which to use for feeding growing ewe lambs.

Black And White Farm

Even Livestock And Poultry Fit Into Color Scheme

A farm in La Grange, northwest of Elkhorn, Wisconsin, has been dressed up in black and white. The "farm that matches," is owned by Hugh R. Adams, a Chicago manufacturer.

The cattle are Dutch belted and the hogs are spotted. Poles, both of the familiar black and white combination. Two black and white goats, in polished black harness, haul the children about in a black and white wagon.

Turkeys on the farm are black and white, and the chickens are Black Sumatras. Dogs and cats fit into the color harmony, and the horses are ebony, with white feet and blanché faces. All farm buildings are white, trimmed in black. Fence posts, which outline the property, are white with black caps, and the trees which shade the spacious lawn are whitewashed to the boughs.

Even the milk stools are white—with black underpins.

New Traffic Order

London Motorists Must Not Swerve To Avoid An Animal

England's humane societies are up in arms over the traffic ministry's latest order that motorists must not in any circumstances swerve to avoid an animal.

The order was issued after a motorist, fined \$50 for dangerous driving, pleaded he had swerved to avoid a dog. "A motorist who does so is an utter fool—for he does not know what human lives he might endanger," said the judge.

Owners of pets have sought to have the edict modified, arguing that a driver could in many instances dodge an animal without endangering freedom.

Freedom Of The Press

If Mussolini did not have 100 per cent. control of the press of his country, his power would be more than halved. Freedom of the press, like air and water, is not appreciated until it is no longer present, states the Hamilton, Ont. Herald. Canadians should remember this any time the slightest effort is made in their country to muzzle a newspaper.

Discovery of the most powerful ray man has ever produced, which penetrates a two-inch lead pipe as light does tissue paper, was recently revealed.

Per Centage Is Small

Fruit Exports Only Small Part Of World Trade

In few countries do fruit exports form a considerable item in the national export trade, says the Imperial Economic Committee's report on fruit. Notwithstanding the fact that in recent years the prices of fruit have fallen somewhat less than those of general commodities, exports of apples in 1933 amounted for just over two per cent. by value of Canada's total export trade, and for one and a half per cent. of the trade of Australia and of New Zealand. Normally, the proportion in these countries does not exceed one per cent.

Fruit and fresh grape exports are of negligible importance, but exports of oranges averaged 15 per cent. of Spain's annual trade in the period 1928-32, and over 50 per cent. of the export trade of Palestine. Bananas account for over 80 per cent. of the exports of the Republic of Honduras, for about 60 per cent. of the Canary Islands' export trade, and for half the export trade of Jamaica and Panama. The wine export trade is of considerable value to Algeria and Portugal, where it accounts for over 40 and 30 per cent. respectively of the total trade. Exports of currants are responsible for about one-fifth of the trade of Greece. The proportion of canned fruit exports exceeds one per cent. in one country only, namely, Malaya. — St. Thomas Times-Journal.

A Law Unto Itself

Science Has Not Yet Discovered Secret Of Genius

"We do not know where great men come from," says Dr. Alexis Carrel, who thinks science can eventually produce supermen. They come from the most unexpected places, and it is to be hoped nature keeps her secret.

The physical standard of mankind can be raised by a higher level of economic well-being, which brings about greater opportunities for mental improvement, but genius has been always a law unto itself and probably always will be.

The coliseum at Rome accommodated 100,000 spectators, 87,000 of whom were seated. Its arena measured 182 feet from side to side, and 285 feet from end to end.

The SNAPSHOT GUILD

SUNSETS

Ever sunset pictures add interest to your snapshot album.

"Did you ever stop to realize how considerable Mother Nature is of the amateur photographer? Month after month she changes the appearance of landscapes, trees, shrubs and even the skies, giving us something new to snap almost every day. She has now shifted her scenery to her autumn display of new flowers, colorful foliage and last but not least—beautiful clouded skies to serve us with fascinating backgrounds for landscapes and sunset snapshots."

Don't overlook the opportunity to capture a few such beautiful sunsets for your snapshot album. They add interest to your picture collections and usually bring that highly prized remark from your friends—"There's a beautiful picture. How did you take it?"

As artists the sunset picture possibility is not waiting for you every night in the week so don't rush out the door after reading this and expect of get one. Maybe you will but it is doubtful. A good sunset picture is just one of those things you watch and wait for.

You will find that a foreground of water or a background of hills will add much to the interest and artistic appearance of your sunset. By all

Highly Rust Resistant Wheat Is Originated At University Of Saskatchewan

Horse Coming Back

Use Of Horser Is On Increase In Prairie Provinces

Canada's horse population has declined greatly during the past fifteen years, due, principally, to the invasion of the motor vehicle into the field of endeavour so long ruled by the equines. Unable to compete with the speed and convenience of automobiles as a mode of transportation the horse naturally suffered in prestige, and with the adoption of power machinery on farms his sphere of usefulness became even more limited, with the result that the number of horses in Canada declined from 3,610,494 in 1921 to 2,933,492 in 1934, notwithstanding the growth of the country during that period.

Despite the continued decline in recent years, indications point to better days ahead for "Old Dobbin" with both horse population and demand on the increase. An estimate of the number of horses in Manitoba as at June, 1935, places the horse population at 297,000, an increase of 1,500 over the preceding year. Another favourable indication is the distinct increase in horse-breeding activities. Horse breeders' clubs in the Prairie Provinces numbered 166 in 1934, an increase of more than 30 per cent. over the number in operation in 1932, and a number of districts reported inability to secure satisfactory stallions. Imports of pure-bred stallions and mares of the draft breeds numbered 50 in 1933, and this number was more than doubled in 1934.

Race Track For Ethiopia

Emperor Haile Selassie of Ethiopia is going to build a race track despite war threats and wants to know how French pari-mutuels operate. The French Racing Association received a letter from the emperor asking full details, which were sent him.

Plants develop fever when they aren't feeling well, according to experiments by experts at College Station, Tex.

"Apex" is the name given a rust-resistant wheat which the University of Saskatchewan may distribute in small quantities this winter. It has been selected and increased after nine years breeding work there, Dr. J. B. Harrington, of the U. of S., announced. He considered that Apex presents a signal advance over Marquis for Saskatchewan conditions in general and particularly for the conditions such as those at the Scott Experimental Farm and north and east of Saskatoon. Thatcher, the wheat from Minnesota which is nearly as rust resistant as Apex, may outyield it under the conditions of eastern and southeastern Saskatchewan.

"The new highly rust-resistant wheat originated at the University of Saskatchewan recently been named Apex and application has been made for the variety to be licensed. Apex was increased this year under contract at Humboldt and Bruno as well as on the university seed farm at Saskatoon and will be increased much more extensively in 1936. It is possible that distribution of small lots of this new variety may be made during the coming winter," Doctor Harrington said.

"The new variety, which, until recently, went under the designation A.75," is the result of nine years of extensive breeding and testing at the university, assisted financially by a grant from the National Research Council of Canada. Apex is the best of a dozen or more highly rust-resistant hybrid wheats which have come out of the university breeding program.

"Apex is so highly rust resistant that even under the very severe epidemic conditions in southeastern Saskatchewan this year, its straw was clean and bright in comparison with the badly rusted straw of Marquis. At the Kelso test Apex yielded at the rate of 24.3 bushels per acre of wheat weighing 58.6 pounds to the bushel and grading 2 Northern whereas Marquis in the adjoining plots yielded at the rate of only seven bushels per acre of shrunk wheat weighing 34.6 pounds to the bushel and grading feed. At Saulteaux, Apex yielded 38.5 bushels per acre of wheat weighing 63.8 pounds per bushel and grading 1 Northern, while the adjacent Marquis yielded 14.1 bushels per acre of wheat weighing only 45.1 pounds per bushel."

How was Apex originated? Doctor Harrington says this is a long story, for the foundation breeding was done years ago by Dr. H. McFadden, of South Dakota, and E. H. K. Hayes, of Minnesota, when they produced their rust resistant wheats H-44 and Double Cross, respectively. Doctor Harrington in 1926 crossed H-44 with Double Cross and in 1927 crossed the H-44 x Double Cross hybrids with Marquis. From this triple cross, he and his assistants selected for several years and finally ended up with Apex.

"The high rust resistance of Apex comes from the combination of the emmer resistance in H-44 and the durum resistance in Double Cross," Doctor Harrington went on. "H-44 is the result of a cross between Yaroslav emmer and Marquis. Double Cross is the result of crossing Marquis with Lumello durum and crossing the hybrids with Marquis x Kanred."

Thatcher is a sister of the Double Cross appearing in the pedigree of Apex and, like Apex, equals Marquis in milling and baking quality. Compared with Apex, Thatcher has shorter, stronger straw and is much less resistant to covered smut as well as less resistant to stem rust. On the other hand, Thatcher is highly resistant to loose smut and black chaff and in the southern Saskatchewan and Manitoba tests, has excelled in yield, straw strength and earliness.

These two new wheats, together with No. 716, which was produced by the Dominion Rust Laboratory at Winnipeg and announced recently at the Dominion department of agriculture, make three highly rust-resistant varieties which, by 1938, will probably replace Marquis over most of the rust area.

Gold mining centres in Soviet Russia now number 1,200.

WORLD HAPPENINGS BRIEFLY TOLD

Reorganization of the whole Alberta relief system will be undertaken by the new Social Credit government at the earliest possible date, Premier Aberhart stated.

Ninety per cent. of the 1935 graduates of the faculty of applied sciences and engineering of the University of Toronto have received employment, Dean C. H. Mitchell announced.

Vice-admiral Sir Humphrey Thomas Walwyn has been appointed governor of Newfoundland in succession to Admiral Sir David Murray Anderson, whose term of office expires next spring.

Col. H. C. Osborne, honorary director of the Dominion Drama Festival announced that Allan Wade, noted British stage authority, will be regional adjudicator during competitions in the 1936 festival.

Charlotte Acres, the Vancouver girl who won the five-mile swim at the Canadian National Exhibition at Toronto, said on her return home she may try to swim the English Channel next year.

As a gesture toward wiping out animosities of the Great War, the South Australian government, on the eve of a provincial election, decided to restore the German names of four towns.

For sale: One island, in excellent condition. The city of Vancouver has an island on its hands, and is looking for a prospective buyer. An inducement, the city will build a bridge from the mainland to the island, if the price is right.

Sir Malcolm Campbell has purchased Headley Grove, a fine Georgian residence near Epsom, but Lady Campbell is authority for the statement that he is not going to settle down quietly as a country gentleman. "He will never give up his motor-racing interests," she says.

Discover Old Catacombs

Excavators In Poland Find Grim Relics Of Polish Revolt

Grim relics of the unsuccessful Polish revolt against Russian rule in 1863 have been found in a monastery at Vilna. Legend has always related that Vilna was honeycombed with underground passages, and recently excavations were undertaken to find them. After several days' work tapping the floor of the 16th century Dominican convent the excavators found an underground passage beginning near the altar steps. Below was the old Dominican cemetery. Rows and rows of defunct monks lay in open coffins on slabs. In an adjoining chamber a ghastly sight greeted the explorers. Piled on each other in heaps were bodies of men, women and children, not decomposed, owing to lack of air. They were the remains of rebels who had hidden in the catacombs, been found and massacred by the Russians, and left where they had fallen.

China's Women Pirates

Terror Stricken Travellers Found They Were A Reality

China's women pirates, seldom seen but famous in song and story along the South China coast, were a grim reality to 300 terror-stricken Chinese travellers who arrived at Amoy aboard the coastal steamer Lokiang. They and the ship were in the hands of two female buccanniers and 40 male subordinates for four days. The passengers and ship were robbed of \$250,000 in cash and silver bars, and the pirates, after killing one passenger and wounding three, escaped in a small boat to a pirate stronghold. The victims of the female chieftains were a strange mixture of merciless outlaw and sentimental womanhood. Before escaping to shore they gave a brother of the slain passenger \$70 "to provide a funeral" and \$250 to each passenger "for transportation."

A Dependable Escort

A strong man to accompany your wife or daughter to parties or shops can now be hired by the hour owing to the enterprise of a retired bushy telephonic official. You have only to telephone if you are busy in the evening, and a muscular chap will call to escort your wife to the theatre.

Praises Men In North

Well Worth Working For States Bishop Of The Arctic

Arctic citizens, white and native, of Canada are decent, law-abiding people, well worth working for, Right Rev. A. L. Fleming, Bishop of the Arctic, a former rector of Saint John, N.B., said on his arrival in Winnipeg from the East over Canadian National Railways.

"I have a great admiration for the white man of the North," Bishop Fleming said, "not because he is a religious man. Some of them are. Many are not. But because he is a real man, facing hardships with courage."

The health of the Eskimo, due to a combination of causes, is better than it was. In the first place, missionaries, the Hudson's Bay Company, or the R.C.M.P., were all able to give out destitute ration in time of epidemic or shortage of food, and the Dominion Government would refund the expenditure. In the old days the natives simply died without care. Increase of hospitalization and better medical superintendence gave the natives a better chance at healthy survival. Trading and police post staffs had some knowledge of medicine which was available to the sufferer, where there was no hospital.

In Bishop Fleming's diocese, which includes all of Canada within the Arctic circle and dips down to the 54th parallel at Fort George, two hospitals are operated under his supervision, one at Pangnienit, Baffin Land, and the other at Akivik, at the mouth of the Mackenzie River.

Eskimo youth graduating from mission schools were being absorbed into the growing life of the North. But they "must be trained in the North," said Dr. Fleming. He told of boys from the Anglican residential school at Shingle Point, Mackenzie River, being taken on as apprentices in herding the reindeer recently brought to that part of the country. He saw a future for Eskimos in this work.

Dionne Quintuplets Bow

A surprise gift offer which will interest every parent, every child and, in fact, everyone who has ever heard of the world-famous Dionne Quintuplets, has been announced. The article offered is a cereal bowl created in honour of the five little sisters and called the Dionne Quintuplets Rite Bowl. Made of shining lifetime smartly designed in modern lines, and chromium, it is six inches in diameter, embossed inside with a charming sculpture of the "Quints". On the rim are engraved the names of the babies: Enile, Annette, Marie, Yvonne, and Cecile. Besides being an ideal cereal bowl for a child, it makes a distinctive olive and celery dish or bon-bon dish.

Readers can obtain this delightful gift by sending two trade-marks from packages of Quaker Oats, plus fifteen cents to help cover postage and handling charges, to the Quaker Oats Company, Saskatoon, Sask.

Offered As Gift

Iron Jewelry Once Prized

Other Metals Replaced By New Discovery In 500 B.C.

Iron jewelry—not gold gems or diamonds—was most prized by the women between the Mycenaean period and 500 years before Christ, Professor T. Leslie Shear, archaeologist of Princeton University, has discovered. In his excavations in the Athenian Agora or market place, Dr. Shear has unearthed many bodies of women bearing ornaments of iron, including necklaces, rings and bracelets. Dr. Shear's explanation is that iron had just been discovered about that time and replaced in vogue among the women ornaments of gold, bronze, copper and other metals.

The office boy hadn't been there long when his employer looked up from an important letter and said irritably: "Don't whistle at your work, boy!" "I ain't whistling, sir," he replied; "I'm only whistling."

Italian Soldiers Deserting

Hundreds Have No Desire To Fight In Africa

Ludwig Loring, in the New York Post says Italian soldiers are deserting to Switzerland, France and Yugoslavia by the hundreds. They have no desire to give their lives for the Fascist fatherland, preferring the uncertainties of a refugee's existence to the certainty of disease and death which awaits those who go to Africa at the Duke's command.

Nuovo Avanti (Paris) publishes interviews with a number of these deserters. "The troops leaving for Africa," says one, "have no faith in the Government's optimistic reports. The Government may deny that disease is ravaging the expeditionary forces. The soldiers know better. You will find a strong anti-war sentiment even among the Fascist faithful. In Milan I was given a leaflet urging young men of Italy to flee, to refuse to go to war. In one district, (Rovereto) every soldier with whom I spoke was either indifferent or positively opposed to war, running away was not a matter of money, hundreds of thousands would have made their way across the borders to evade conscription..."

India Becoming Richer

Research Shows Standard Of Living Is Also Higher

India is growing richer rapidly, according to researches made by B. B. Sen, I.C.S., of Bombay, who has been Press Officer to the Government of Bengal. The Government has just published his brochure in which he argues that the higher standard of living can be seen from the increase in the consumption of a large amount of articles imported from foreign countries as well as from local production. The per capita consumption of cotton cloth in the beginning of the twentieth century was only 8.39 yards; it has now risen to 12.11 yards, an increase of over 50 per cent. He also points out that, while the average income has risen from 20 rupees in 1871 to 107 rupees in 1921, the rise in prices during this period has roughly been two and a half times. This shows, he says, that the real income of the mass of the people has been doubled.

A new plastic "glass" has nothing in common with ordinary glass, except its transparency. It is probably a cellulose derivative like cellophane.

Paper linings have been invented for the tops of coffee percolators to prevent the ground coffee falling through and facilitate its removal.

Household Arts

PATTERN 5446

Forward march—that was the order for the Fall beret. And it has done just that and we're fallen right in line and like its forward trend. Why shouldn't we when it adds that "come hither" look to the nattering beret. You'll like this crocheted one with its matching purse—they're both so easy to make. The chief decoration, the ribs, are arranged in a fan-like design. You can make it of Shetland as well as other wools. So get out the crocheted hook and let it work wonders in adding the chic of these matching accessories to your wardrobe.

In pattern 5446 you will find complete instructions for making the set shown as illustration of it and of the stitches needed material requirements.

To obtain this pattern send 30 cents in stamps or coin (postal preferred) to Household Arts Dept., Winnipeg Newspaper Union, 316 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

SUNDAY SCHOOL LESSON

ISAIAH PORTRAYS THE SUFFERING SERVANT

Golden text: With his stripes we are healed. Isaiah 53:5.
Lesson: Isaiah 52:13 to 53:12;
John 19:17-37.
Devotional Reading: Revelation 6:9-14.

Explanations and Comments

The servant of Jehovah a Man of Sorrows, verses 4-6. Who is meant by the term the servant of Jehovah? Incidental allusions to the servant of Jehovah are scattered throughout the second part of the Book of Isaiah, but the main passages are these: 41:8-20; 42:1-7, 18-25; 43:5-10; 49:1-9; 50:4-10; 52:13 to 54:12. What was the conception in the mind of the prophet? Was the servant a personification, or a person? If a personification, was he the Israelitish nation as a whole, or the best portion of that nation—the righteous nucleus? The exiles in Babylon, or that part who remained loyal to Jehovah throughout all the trials of the Exile and thus kept alive the true religion? If a person, was he ideal, or real? A prophet, or Hezekiah, or Johoachim? Or was he one still to come, the promised Messiah?

The Vicious Suffering of the Servant of Jehovah, verses 4-6. It has been the burden of others, not his own, that the servant has suffered; yet we thought that he was stricken, smitten and afflicted by the hand of God because of his own sins, his sufferings were caused by the burden of others that he was carrying on his frail shoulders, our iniquities. In the ancient world a great sufferer was thought to be a great sinner. Recall how the friends of Job repeatedly declared or hinted that his grievous sufferings were sent because of some hidden sin of his in the past; and how Jesus protested against the assertion that the men on whom a tower fell were sinners more than most men, Luke 13:1-5.

Arabs Form First Parliament

Nomads Of Near East Select A President

That the Bedouins, the Arab nomads of the Near East, have formed their first "Parliament," has been reported from Cairo, Egypt. Delegates from 75 Bedouin tribes, representing 1,000,000 Bedouins of Egypt, met under the presidency of Sheikh El Arab S. E. Hamad El Bassel Pasha. They formed a committee to deal with such questions as the development of compulsory education among Egyptian Bedouins, protection of the rights held by Bedouins, the preservation and maintenance of Bedouin customs, and contribution to the development of intellectual intercourse between the Bedouins of Egypt and those of Arab countries.

British excavations in the Shetland Islands reveal remains of buildings of Vikings in the 10th century.

A Colony Of Forgotten People

Families From Southern States Live In Amazon Jungle

The discovery in the Amazon jungle of a colony of "forgotten" people, descendants of aristocratic Southern families, who migrated, by Dr. W. H. Haas, lecturer and Professor of Geology at Northwestern University, Chicago. Dr. Haas came upon the colony during one of his exploration trips up the Amazon. The colony is named Santarin, and is situated on the banks of the Tapa Joa River, a tributary of the Amazon. The settlement, Dr. Haas said, is 600 miles inland from the ocean. In the tiny village of about 300 people, Dr. Haas met a woman who had moved to the tropics immediately after the war between the States. "She was living in the past," he declared. "As I talked with her she seemed to forget her bedraggled clothes, her bare feet and her primitive surroundings. She recalled her father's extensive plantation back in Alabama, with slaves singing and working in the cotton fields." She told Dr. Haas that a number of Southern families, who were dissatisfied when their slaves were freed as a result of the war, moved to the Amazon basin, where slavery was permitted and where they hoped to begin life anew. But the hopes of these plantation owners were soon blasted. The moist climate was not fit for growing cotton and there was no market for other products. In the midst of dense forests and located so far from civilization, the hopes of these plantation owners were soon blasted. Many of the younger Southerners, dissatisfied with the poverty and ignorance of the village life, returned to the United States. The others remained to eke out an existence by growing pumpkin, cocoa and beans.

New Optical Apparatus

Instrument Just Produced Makes It Possible To See Heat

For a long time the electrical industry has been troubled on account of the heat generated by an electric light bulb tending to rot the flex which suspends it. In consequence, the British Electrical and Allied Industry Research Association asked three young London scientists to find a way to get rid of the heat.

These scientists have been at work for nearly three years and have produced an optical apparatus which makes it possible to see heat. Looking at a suspended electric-light bulb through the instrument, one can see heat, like smoke licking round the flex, just above the bulb.

The apparatus can also be put to other useful purposes, for instance, finding the best methods of heating and ventilating rooms, theatres or factories. With a small model of a room one can see the draughts and paths of heat.

A test made with a heated rod makes it look like a flaming brand. When an outboard and heat plate against the instrument appears to be on fire, and one's breath, even in a well-warmed room, looks like a jet of tobacco smoke.

The Safety in Mines Research Board are already using the device for discovering the force and effects of explosives.

Recent Competition

Professional Beggars In Paris Want Protection Against Amateurs

Unfair competition is claimed by Paris beggars. With the approach of the tourist season, the official newspaper of French beggars—Le Journal des Mendigots—published a vigorous editorial calling on all professional charity-seekers to defend their interests against amateurs. This newspaper, which has a tremendous circulation among mendicants, points out that non-professional beggars are trying to crash the beats reserved for professionals. It demands that a united stand be made by all self-respecting members of beggaredom against these "enterprising upstarts."

An Oxford don says that he has kept statistics for years and finds that no recorded man or woman ever won a first in history at the university. If this is how he occupied his time it is surprising that anybody got a first, or even a pass.

SAYS ITALY IS PREPARED TO MEET WAR WITH WAR

Rome.—Benito Mussolini, his face clenched, sternly pledged to mobilized Fascist nation to meet "war" with "war," if the League of Nations imposes military sanctions upon Italy.

High on the balcony of his Venezia palace, illuminated by flares, Il Duce spoke, he said, to "20,000,000" men mobilized in public squares throughout Italy.

"A solemn hour is about to strike in the history of the fatherland," Il Duce shouted.

His voice carried to 7,329 communities. Slowly, but forcefully, Premier Mussolini almost shouted each word with long pauses between them. Throughout there was the silence of an army on review, punctuated with the widest cheering.

Benito Mussolini pledged his nation to meet force with force and to bear economic sanctions "with discipline."

"War," he said, "would be met with war." He said he did not believe "real French" or "genuine British" would execute sanctions against Italy.

"We will not pretend. To economic sanctions, we will reply with the discipline of our people. To military ones, we will reply with military action."

He declared: "Not only our army marches towards its goal, but 44,000,000 Italians are marching with the army."

Dramatically Mussolini, pointed from his balcony to the moment of the unknown soldier.

He recalled "Italy's 600,000 year deaths" but told them that after war "only of disillusion came."

"Black shirt men and women of Italy," said Mussolini, "I speak to 20,000,000 men and women. Not only our army marches towards its goal, but 44,000,000 Italians are marching with the army." He said Italy would respond to "war with war." He declared he did not believe that "the real French" associate themselves with sanctions against Italy.

Mussolini said that the league "instead of recognizing Italy's rights, talks of sanctions." As he spoke of the "real French," he said: "I refuse to believe that the genuine Britons will associate themselves with sanctions to protect a barbarous people."

Rpd, white and black posters bearing Mussolini's profile were displayed on buildings proclaiming Italy's preference for peace but her readiness for war with some blunt language directed at Great Britain.

"Italy loves peace," said these posters, "but not unless it is founded on justice."

"We have had friendship from the English people—since friendship, the friendship through a course of years. But to-day we find it simply monstrous that this nation which dominates the world refuses us a poor strip in the poor land of Africa."

Trouble In India

British Concentrate Forces In The Province Of Peshawar

Bombay.—Arrangements for some concentration of forces were made by the British government for India as a result of trouble in the north-west province of Peshawar.

Several army units have been ordered to stand by for orders. Their leaves cancelled, 800 officers have been ordered to return to active duty. The Somerset light infantry regiment was embarked for an unannounced destination.

The government, it was said, planned to introduce legislation making permanent the emergency ordinances issued several months ago.

Manitoba Road Program

Brandon, Man.—The hard-surfacing road programme is proceeding eastward at the rate of about one mile a day, and the contractors are nearing Chatter. The No. 1 highway job between Sydney and Brandon will be completed this fall and if weather conditions hold good. There are some rumors that the governments are contemplating the hard-surfacing of No. 1 highway west to the Saskatchewan boundary, next year.

New Cancer Treatment

Kingston Doctor's Method Is Receiving Attention

Montreal.—A treatment for cancer, in which malignant cells are said to be digested by a method resembling the natural digestive processes of the human body, is described in the Canadian Medical Association Journal by Hendry C. Connell, M.D., of Kingston, Ont.

The Journal, official organ of the Canadian Medical Association, prints also a column editorial stating that Connell's work "cannot be lightly passed by."

His report described 20 human beings, all given up to die of cancer, injected intra-muscularly with his digestive fluid in May, June, July and August, this year.

Two have returned to work apparently well. Four died. The pain of five is completely gone. The pain of nine others is less. In a number of cases the cancerous growths appear smaller.

In about one-third of the cases little change is apparent.

Studying New Proposal

Winnipeg May Decide To Electrify Its Street Signs

Winnipeg.—Having taken a deep breath and blinked its collective eyes, Winnipeg's public utilities committee studied anew a proposal for renovation of city street identification—at a cost of \$1,500,000. Although the cost left the committee agape, it did not definitely reject the proposal. The matter was referred to the city engineer for a report.

In brief, it was proposed Winnipeg erect illuminated signs, two to three feet in diameter, at all intersections. Street would be designated by blue lights; avenues by red, the names spelled in light easily visible to pedestrians and motorists.

It was estimated 10,000 to 20,000 intersection standards would need to be erected, at a cost of \$100 per installation. An assessment of five cents monthly on every home would take care of the expenditure, the scheme's sponsors claimed, and the publicly-owned hydro system would gain \$150,000 annual revenue.

Ship War Materials

United States Reports Munitions Shipped To Italy

Washington.—The government reported that comparatively minor exports of fighting equipment had been shipped from the United States to Italy but listed his shipments of material that goes into its making.

Secretary of State Hull, in whose department the new munitions control board functions, made available figures to show that only about \$340,000 in arms, cartridges, aeroplanes and aeroplane engines were shipped up to Sept. 23 this year, of which \$336,000 was in aeroplanes and engines.

Commerce department foreign trade figures for August, however, showed near record shipments of cotton liners, useful for explosives; soap iron and steel; trucks which could carry troops, and tractors convertible into tanks. Most of the trucks went direct to Italian Africa.

Round The World Flight

Clyde Pangborn Contemplates Trip Over Northern Route

Blissmark, N.D.—Clyde Pangborn's contemplated non-stop world flight next fall, he said here, will be a 110-hour trip if all goes well, on a northern route.

"I'll skip Japan this time," he said, recalling two months spent in a Japanese prison in 1931 for flying over a fortified area without official sanction. Pangborn, now on a commercial flight, was en route to New York.

Will Retain Name

Halifax.—In future there can be no further objection, legal or otherwise, to use of the name "Presbyterian Church in Canada," Rev. Dr. Frank Blair of Picton, N.S., told the maritime synod of the church, Dr. Blair, clerk of the synod, said court decisions had settled the argument, which arose when some Presbyterians entered the United Church of Canada.

ITALY'S DELEGATE

Here is a close-up of Baron Alois, Mussolini's delegate at Geneva, who is very much in the news at the present time.

Food Shortage

Enforce Regulations Against Food Hoarding in Germany

Berlin.—The shortage of butter, milk, lard and other basic foodstuffs became acute in Germany as authorities moved to replenish dwindling supplies and enforce regulations against food hoarding.

Long lines of shoppers formed at dairies and butchers' shops demanding milk, lard and other food. Police were stationed at the stores to see that regulations were enforced. During the last few days dairies have been rationing food, selling only a quarter of a pound of butter for each family.

The government arranged to import 500 hogs weekly from the Netherlands. A large order for lard also was placed with Dutch dealers. The last farm census showed 22,500,000 hogs in Germany compared with 28,000,000 a year ago.

Ceremony For Hindenburg

Body of Field Marshal Now In Permanent Resting Place

Berlin.—The body of Former President Paul von Hindenburg has been transferred from a side tower of the Tannenberg memorial in East Prussia to a permanent resting place in the main tower of the great structure erected to commemorate the field marshal's most famous battle. The ceremony was carried out with great military pomp in the presence of Reichsfuhrer Hitler while the day—Von Hindenburg's birthday anniversary—was celebrated throughout the nation.

Not Admitted

Calgary.—A proposal that former soldiers of countries opposed to the Allies during the Great War be admitted to membership in the Canadian Legion, British Empire Service League, has been voted down by the Calgary branch of the legion. The resolution would have given Germans, Austrians and Turkish war veterans full privileges of legion membership.

Co-Operation Is Asked

Election Officers Requested To Send In Results Promptly

Ottawa.—Election officers should do whatever they can to aid the Canadian Press by promptly collecting accurate returns of the Dominion elections on October 14, said Jules Castonguay, chief electoral officer.

"Every election officer and particularly every deputy returning officer and poll clerk should do whatever he can to furnish to the Canadian Press, newspapers and their accredited correspondents, as early in the evening as possible, accurate statements of the results of the vote at every polling station," he said.

Mr. Castonguay pointed out that when deputies complete their statements of the result at each polling station the information they contain is public property.

The chief electoral officer included in ballot boxes instructions to deputy returning officers to co-operate with the Canadian Press and its accredited correspondents and repeated these instructions to returning officers.

Conspirators In Revolt

Plot To Kill King Of Bulgaria Is Nipped

Sofia, Bulgaria.—Conspirators in a revolt which the government claimed it had planned, to assassinate King Boris III, it was learned upon good authority.

There were no official revelations of details of the plot, that an attack was to have been made on the king as he appeared before his subjects to review a parade in celebration of the anniversary of his accession to the throne. Army officers were among a number of persons arrested.

Marching soldiers were to have been without ammunition, it was understood, and in the confusion following the attack the plotters hoped to take control of the arsenal and public buildings.

At the same time, the capital learned of the conspiracy, it received a report from Burgas saying former premier Kimon Gueorgueff was arrested there, the second time he has been in custody this year. Sofia was under a rule of bayonets with martial law declared throughout the country and the capital itself under a state of siege.

Livestock Men To Vote

Prairie Producers Will Give Decision On Marketing Schemes

Saskatoon, Sask.—Preparations are under way for a vote of livestock producers in Saskatchewan, Alberta and Manitoba on proposed marketing schemes, the vote to be taken during the first week of December, the Saskatchewan livestock pool announced.

At a meeting of the executive from the three prairie provinces with Mr. Leitch, the chairman of the marketing board, held in Regina, it was revealed that details of the schemes for the three provinces were completed. It is understood that the schemes are practically identical except for the application to local conditions.

BRITISH LABORITES RESIGN

Sir Stafford Cripps, left, and Lord Ponsonby, right, who have resigned from the executive committee of the British Labor Party, in protest to the party's approval of the Government's policy is demanding imposition of sanctions against Italy if Ethiopia is attacked.

BRITISH LABOR PARTY IN FAVOR OF SANCTIONS

Brighton, England.—The British Labor party lined up in favor of the use of full League of Nations sanctions, even of a military nature, in the event of Italian aggression in Africa. By a margin of 20 to one the party supported the recent action of the International Trade Union Federation.

The decision of Great Britain's strongest opposition party was taken as press headlines told of the first alleged violation of Ethiopia's frontiers.

The vote, taken by a card ballot at the party's annual conference, showed 2,168,000 for sanctions to 102,000 against.

The vote was greeted with resounding cheers from the convention floor, which had been for a day the scene of a bitter contest by a relay of speakers.

Herbert Morrison, winding up the debate for adherence for the use of sanctions, asserted:

"Military sanctions cannot be ruled out. If they are ruled out you may weaken the power for peace of the league."

Salute From Crown Prince

See Denial Of Rupture With Fascist Movement

Naples.—Crown Prince Umberto emerged at the Italian mobilization as a staunch Fascist.

After listening to Il Duce's stirring speech, thousands of Neapolitans assembled at the royal palace and called for the crown prince. Umberto stepped to a palace balcony, and as the throng cheered wildly gave the Fascist salute three times.

The Neapolitans saw in this gesture a final denial of recent reports of a rupture between the crown prince and Il Duce.

Flyers Go To Gibraltar

Thirty Men Added To Royal Air Force Detachment

Gibraltar.—Thirty British flyers have been added to the Royal Air Force detachment stationed here. The flyers arrived on the steamer Kaiser-I-Mind, on which Air Marshal Sir Robert Brooke-Popham also was a passenger. Sir Robert, commander-in-chief of Britain's air defence forces, conferred with flying officers and then left on the same liner for Malta.

Faces Perjury Charge

Drumheller, Alta.—John Shalay of Newcastle, alleged to have falsely sworn he was a British subject when voting in the Alberta election August 22, was remanded for trial at the November sittings of the supreme court when he appeared before Magistrate L. O'Connor on a charge of perjury. He was freed on \$2,000 bail.

Jap Officers Poisoned

Okayama, Japan.—The poisoning of more than 300 officers and men and a majority of the 39th infantry regiment, two of whom died, caused the abandonment of the divisional manoeuvres in which the regiment was engaged. The poisoning was attributed to the eating of octopus, considered a delicacy in Japan.

Retire Civil Servants

Edmonton.—Some 32 civil service members who have reached the age limit will be retired immediately, with but few exceptions, Premier Aberhart announced following a cabinet meeting. In a few cases, the officials will remain possibly a month to complete their work.

Investigator Is Stumped

Windsor, Ont.—Ald. O. E. Fleming, delegated over a week ago to investigate working conditions at the Windsor market, is stumped. Everything in the market books is written in Hebrew, said the alderman. Now we need a Hebrew expert.

Johannesburg, South Africa, may ban all parking in the business district.

STONY PLAIN SUN.

Published Every Thursday at The Sun Office, Stony Plain.

Thursday, Oct. 10, 1935.

Advertising Rates:

Display, 40 plates, 25c per column inch—Readers in Local, 15c line. Legal and Municipal Notices, etc., 15c line first insertion; 10c line each subsequent insertion.

Saturday Evening's Movies.

Special German pictures will be shown in Stony Plain on Saturday Evg. next, the 12th. This picture is entitled "Das Maedel von der Reeperbahn" (The Girl from the Reeperbahn). The show will start at 8 p.m., and Mr. Stuermer is sure this picture will please all. This picture is an agreeable German talking and singing production made abroad. Clear story and songs give it fair appeal.

Open Seasons for Game.

Deer, moose, Nov. 1 to Dec. 14 Ducks, geese, Sept. 16 to Nov. 14 Elk, Oct. 1—Dec. 14 Grouse, Oct. 1—10 Hungarian Partridge, Oct. 1—Nov. 30

Fox, Nov. 1—Jan. 31 Mink, martin, otter, Nov. 1—March 31

Muskrat, Mar. 1—April 30 South of N. Saskatchewan river, no open season.

Sunday Shooting is prohibited. Licenses may be procured at The Sun office.

C. N. Train Service.

The train No. 190 leaves Jasper for Edmonton Monday, Thurs. Sat. arrives Stony Plain 4:51 a.m.

Train No. 189 leaves Edmonton 9:30 p.m. Tues., Thurs., Sat., and arrives Stony Plain 10:37 p.m.

THE NEWS OF STONY PLAIN AND DISTRICT.

Mrs. John Eberhardt and children, who had been visiting here with Mrs. Abernethy's parents, left Sunday for their home in Edson.

Mr. Karl Grosskopf, Bright Bank's enterprising farmer, is arranging to spend a few months in the Homeland, and will be leaving in a short time.

Miss Bertha Wudel arrived home on Tuesday from a vacation spent with friends in Chicago.

BIRTH—In Stony Plain, on Monday, Oct. 7, to the wife of Mr. Wm. Hatley a daughter.

Posters indicate that Mr. Edw. Reinhardt, Blueberry district, will hold an auction sale of stock and implements on Friday, Oct. 11.

W. F. Kuhl, the social credit candidate, will give an address at Golden Spike on Saturday next.

New and second-hand text books for public and high schools on sale at The Sun Book Shop.

BUTTER AND EGGS WANTED at The Royal Cafe.

How Blue Eyes Get Black.

A scrap on Main St. late Saturday night which is said to have started in an argument over Mussolini and the Ethiopian Emp. was engaged in between two young threshermen. When it came to the blow-for-blow stage, friends interfered. Upon being parted, it was found one of the combatants had acquired a darkened eye as a souvenir.

Rural Line Strategy.

The lady had tried in vain to get the telephone but the other parties were using the line. The last time she tried she heard one woman say "I have just put on a pan of beans for dinner."

The lady tried later, but the women were still talking. Exasperated, she broke in crisply: "Madam, I smell your beans burning."

A horrified scream greeted this remark, and then the lady was able to put in her call.

Worrying About Jack.

Bon Vivant: Haven't seen Jack at the club for a week. Mrs. Jack: No; Jack's been out of town.

Bon Vivant: We were beginning to worry about him. We feared he was staying home.

Keep Yer Eggs in One Basket

"Sectional parties were springing up in Canada as a result of the erroneous Conservative government policies of the past five years," said Mackenzie King in a recent speech at Regina. Canada needed political parties covering the whole country which would promote national unity and not create dissunity. "Let me say this to my social credit friends," said Mr. King. "There is an old saying: 'Don't put all your eggs in one basket.' You have got a basketful of social credit eggs in Alberta, and you don't know yet whether they are good or not. You have already been told you'll have to wait 18 months to find out, and you know what happens to an egg when you keep it 18 months. Wouldn't it be well to keep those Alberta eggs in one basket and have another basket for Dominion affairs—one which will serve you if the other should not?"

Use Liens to Collect Loans.

According to notice appearing in last issue of the Alberta Gazette Liens taken to cover advances made to Alberta farmers for feed grain and fodder during 1933-4 are to be used in making collections. The notice states that seizures are to be effected in cases where they may be considered necessary. The order authorizes fieldmen employed by the Dept. of Municipal Affairs and Sec.-treasurers of M.-D.s to carry out the collections, effect seizures "and do all things necessary to carry out provisions of the Act." The legislation gives to the Minister of Agriculture authority to enforce collection at any time he considers security for the loans in jeopardy.

THINGS WHICH FARMERS BUY.

Regarding the setting of 87 1-2c as the minimum price for wheat, the Bulletin issued by the Searle Grain Co. has this to say: "We note that some appear to be of the opinion that the setting of the minimum price will solve all the farmers' economic troubles.

"We suggest that farmers should not be deceived by such opinions, for it is quite certain that the average wheat producer of western Canada will be quite unable to make much headway out of the depression, and will be quite unable to pay his past debts, even with a price of 87 1-2c per bu., if the Cost of the Things; He Buys remains at the present high level.

"The Searle Index reveals that the prices on the average of the 'Things which farmers buy' are 25.4 p.c. higher than they were before the war. If these prices remain at this level, for the average farmer of western Canada to be as well off as he was in 1913-14 then the price of wheat, we calculate, would have to be not far short of \$1.20 per bu.

"If, on the other hand, the price of wheat stays approximately at present levels, then it will be necessary, if our producers are to enjoy even moderate prosperity, that the prices of the things they have to buy shall be reduced by at least 20 p.c. The problem of the reduction of the prices of 'Things farmers buy' appears to be the most important matter facing Western farmers today.

Grading of GARNET WHEAT

grades will be established for Garnet Wheat, effective August 1, 1935.

All farmers should have this in mind in preserving and procuring seed for the sowing of their 1935 wheat crop.

In accordance with an amendment to the Canada Grain Act passed at the 1934 session of the Parliament of Canada, separate

Filling Stations Close 8 P.M.

in Edmonton, at the present time, so localities visiting the City should fill up their tanks before leaving Stony. This City order was issued for the benefit of both motorists and filling station operators. Chief of Police Shute is reported to have said: "This 8 p.m. closing hour remains until the 1st of April, when it moves back to 10 p.m. for the summer."

"Bill" Didn't Know His Lesson

(Edmonton Journal, Oct. 3.) Resignation of William Anderson as deputy minister of trade and industry was demanded by the Government on the grounds of his lack of knowledge of the principles of social credit. It is learned definitely by the Journal. The deputy, who assumed his office a year ago, was called into the office of Hon. W. N. Chant, minister of trade and industry and quizzed on his knowledge of social credit. "As the information which he received was deemed by the minister to be unsatisfactory, the deputy was told forthwith that his resignation was required. It is understood the minister explained that the Government desired to have a deputy in this department conversant with social credit principles."

World Wheat Situation Improves.

World's burdensome wheat surplus has practically disappeared. World's available supplies will come closer to world's requirements than in any year since 1928. Russia is Canada and the U.S.A., drought in Argentina and Australia have brought about this situation, and so a rise in price. Fear of war also tends to increase price. Other price-making factors are the amounts Russia and European countries will buy for sale. The purchasing power of the wheat importing countries as well will have an influence. In any case the situation from the viewpoint of the producer has greatly improved.

SEARLE GRAIN COMPANY, LIMITED, WINNIPEG

Tax Luxuries for Necessities:

With Thanksgiving Day upon us, and Christmas in the offing, those who are thinking of celebrating on these occasions with a modicum of joy water would be well advised to make their purchases of these now, as it is rumored that liquor prices will go higher in the province, in order to provide the Provincial Government with \$300,000 additional revenue in the present fiscal year. The proposed increase will apply to beer as well as hard liquors, it was indicated. Estimates passed at the last session of the Alberta Legislature provided for a net revenue of \$1,300,000 in the fiscal year ending March 31 next from liquor profits. Premier Abernethy is credited with expressing the opinion that the consumption of liquor was looked upon as being in the luxury class, and it was felt that those able to make these purchases would

be willing to contribute a small amount toward the upkeep of people who were not in a position to buy even the bare necessities of life.
